

Because of
SISKIN
HOSPITAL...

I can *live*
happily ever after.

On Mother's Day 2010, Megan Trussell's dreams were almost lost when she suffered a stroke at age 25. This young mother was fortunate to be alive, but was left partially paralyzed and unable to care for herself or plan her future.

With her young daughter as motivation, Megan worked hard to re-learn everything. The caring staff at Siskin Hospital was there every step of the way to help Megan piece her life and dreams back together again. With their help, she was able to regain the ability to speak and care for herself...and on her wedding day, Megan was able to walk down the aisle to begin living happily ever after.

Because of Siskin Hospital, I CAN.

Siskin Hospital's Stroke Program is the *only one of its kind* in Chattanooga. With a dedicated unit that boasts oversized private rooms, Siskin Hospital's Stroke Program offers a full continuum of care and an experienced, specially trained stroke rehabilitation team whose focus is to safely return patients home. Advanced treatments and state-of-the-art equipment, as well as extensive education training and resources, have helped patients achieve positive recovery outcomes. Siskin Hospital's Stroke Program has earned a specialty CARF accreditation, which demonstrates the program's exceptional patient care and the best recovery results possible.
