

Accessibility Survey

Name:

Date of form completion:

Please identify any real or potential barriers that you have identified anywhere within the hospital or on the hospital grounds. After you have added all the pertinent data which you have observed, please forward to any person on the Leadership Team.

1. Architecture (structural) barriers. Barriers that are typically easy to identify such as steps without ramps which prevents access to buildings, narrow doors, etc.

Location	Description of Barrier	Real or Potential	Suggested Actions

2. Environmental barriers: Any location or characteristic of the setting that compromises, hinders, or impedes services delivery and the benefits to be gained. Low lighting, excessive noise, open treatment areas that comprises confidentiality or poses a distraction, etc.

Location	Description of Barrier	Real or Potential	Suggested Actions

3. Attitudinal barriers: Assumptions or biases that personnel or stakeholders have of persons served or their families / support systems that may impact access to services. Issues range from weight, level of assistance required, age, ethnic background, etc. Look for evidence in actions as well written material.

Location	Description of Barrier	Real or Potential	Suggested Actions

4. Financial barriers: Includes limited payment for needed services, insufficient funding for services, etc.

Location	Description of Barrier	Real or Potential	Suggested Actions

5. Employment barriers: Include limited involvement of employers in work placement, lack of understanding of onsite treatment for return to work success, and unwillingness / inability of employers to modify work requirements

Location	Description of Barrier	Real or Potential	Suggested Actions

6. Communication: Includes lack of translation of materials into a language or formats that are appropriate for stakeholders to understand, lack of assistive technology to augment communication or website accessibility issues.

Location	Description of Barrier	Real or Potential	Suggested Actions

7. Transportation barriers: Include persons being unable to get to service locations, limited public transportation, availability, etc.

Location	Description of Barrier	Real or Potential	Suggested Actions

8. Community integration: Any barrier that would keep the persons served from returning to full participation in their community of choice.

Location	Description of Barrier	Real or Potential	Suggested Actions

8. Technology: Any barrier that would keep the persons served from effectively utilizing technology in any aspect of their life.

Location	Description of Barrier	Real or Potential	Suggested Actions
